

MINI LOGGER

ANOTHER GPS LOGGER BREAKTHROUGH

The Mini Loggers were designed primarily for Air Racing flight logging as well as for the Microlight market. It uses the now well-known Air Observer software and RS 232 interface.

Key features are:

- Very small and light weight
- 12 channel GPS
- Integral antenna
- Minimum of 10 hours logging time
- Uses Air Observer software

There are two versions available. Referring to the picture, the one on the left is the Mini Logger and the one on the right is the Micro Logger.
